

Your end-to-end pathway into
Canada's top colleges and universities

BRAEMAR
COLLEGE

Partners of Braemar College

Braemar College, a leading private high school in Toronto, Canada, has come together with **VMG English** in Vietnam, to provide Vietnamese students with an online double-diploma program, as well as a fast and efficient online OSSD post-secondary pathway into top colleges and universities.

BRAEMAR
COLLEGE

Since 1995, Braemar College has been a leader in helping young people achieve their academic goals. We are honoured to partner with VMG English in Vietnam, which has emphasized from the very start the highest standards of customer service and the important role education plays in the development of every individual. We look forward to providing their students with innovative double diploma programming as well as a seamless pathway into Canada's top post-secondary institutions.

VMG English has partnered with Braemar College – one of Canada's leading international high schools – to provide Vietnamese students with access to Canadian-standard academic programs and a more effective pathway to studying abroad. Braemar's collaboration is an important step in helping VMG deepen academic quality and strengthen international connections for its students. With a mission to develop a comprehensive educational ecosystem, VMG focuses not only on language training but also on building academic foundations, global thinking, and confidence for students to thrive internationally.

Credit transfer

COMPREHENSIVE TESTING

All students are tested in English and math to ensure they are in the most suitable class.

CREDIT TRANSFER

If you have completed high school work in your home country, the guidance office would grant what are called equivalency credits. Students who have completed grade 11 or higher, and show a high level of ability on the Mathematics and English placement tests, may on that basis receive extra equivalency credits.

CUSTOMIZED STUDY PLAN

Drawing on the experience of two decades, our guidance team will draw up a personalized study plan, designed to get you from where you are to where you want to go, giving you, from the very beginning, a clear sense of the big picture.

Academic transitions

CREDITS GRANTED FOR EACH GRADE

Grade 9 → 8 credits

Grade 10 → 16 credits

Grade 11 → 24 credits*

*Based on the math and English placement tests. For each level below grade 12, credits are granted according to the following chart:

HOW MANY CREDITS (COURSES) REQUIRED FOR THE GRADE 12 YEAR?

		MATH 12	MATH 11	MATH 10	MATH 9
Level 7	English 12	6	7	8	9
Level 6	English 11	7	8	9	10
Level 5	ESL E	8	9	10	11
Level 4	ESL D	9	10	11	12
Level 3	ESL C	10	11	12	13
Level 2	ESL B	11	12	13	14
Level 1	ESL A	12	13	14	14

Braemar DoubleDiploma

Braemar OnlineFoundation

DOUBLE DIPLOMA

Complete a Canadian high school diploma while studying at your high school in Vietnam.

- Improve English Proficiency
- Learn new ways of thinking
- Develop the capacity to work independently
- Improve your CV with a second diploma

ONLINE FOUNDATION

Complete an online pathway into post-secondary programs all around the world.

- Customized studyplan to get you where you want to go
- Programs can be completed fully online or in-person
- Full application pathway support
- Qualify for exclusive scholarships

MY BLUEPRINT

myBlueprint is a comprehensive online education, career/life planning, and digital portfolio tool designed to meet students' learning needs, interests, and aspirations. myBlueprint gives students the opportunity to become an architect of their own future.

ON-TARGET SYSTEMS

Our On-Target systems as well as our guidance team are there to help keep you focused and motivated, ensuring you finish your work on time.

ONLINE MENTORING

Your online mentor is there for you throughout, answering your questions, and supporting you as you develop time-management skills.

APPLICATION SUPPORT

For over twenty-five years our guidance team has been helping international students enter Canadian post-secondary programs at all levels.

EXCLUSIVE SCHOLARSHIPS

Our students benefit from exclusive Braemar-only entry scholarships to some of Canada's top universities.

"Braemar College prepared me well for my University experience. I set my plan way before coming to Computer Science at Ryerson University."

Humanities Pathway

The chief aim of our Humanities Pathway is, first, to expose students to ideas and cultural traditions central to becoming mature and thoughtful adults, and, second, to prepare and qualify students to enter competitive undergraduate arts programs (e.g., Politics, Psychology, Philosophy).

Course Selection

To enter the year 12 Academic Humanities Pathway, students must have completed the equivalent of grade 11 and place at the grade 12 English and Mathematics level. The personalized study plan will determine which two of these credits will be completed in the Hybrid Education format, as well as which of the optional courses will be available.

STUDY PLAN: 6 COURSES

Required course:

Grade 12 English

Highly recommended

Grade 12 Philosophy
Grade 12 Political Science

Optional related courses:

Grade 12 Music
Grade 12 Social Science (History & Geography)
Grade 12 Dramatic Arts

Other optional courses

Grade 12 Math (Advanced Functions, Calculus)
Grade 12 Science (Biology, Chemistry, Physics)
Grade 12 Business

Optional Related Programming (examples):

Student Government
Model UN
Film & Drama Club
Eco Club
Mindfulness Club
The Braemar Bugler school newspaper
Shakespearean Theatre
Toronto Symphony Orchestra

ENG4U1 ENGLISH

This course emphasizes the consolidation of the literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyze a range of challenging literary texts from various periods, countries, and cultures; interpret and evaluate informational and graphic texts; and create oral, written, and media texts in a variety of forms. An important focus will be on using academic language coherently and confidently, selecting the reading strategies best suited to particular texts and particular purposes for reading, and developing greater control in writing.

HZT4U1 PHILOSOPHY

Questions and Theories This course enables students to acquire an understanding of the nature of philosophy and philosophical reasoning skills and to develop and apply their knowledge and skills while exploring specialized branches of philosophy (the course will cover at least three of the following branches: metaphysics, ethics, epistemology, philosophy of science, social and political philosophy, aesthetics). Students will develop critical thinking and philosophical reasoning skills as they formulate and evaluate arguments related to a variety of philosophical questions and theories. They will also develop research and inquiry skills related to the study and practice of philosophy.

CPW4U1 CANADIAN AND INTERNATIONAL POLITICS

This course explores various perspectives on issues in Canadian and world politics. Students will explore political decision making and ways in which individuals, stakeholder groups, and various institutions, including governments, multinational corporations, and nongovernmental organizations, respond to and work to address domestic and international issues. Students will apply the concepts of political thinking and the political inquiry process to investigate issues, events, and developments of national and international political importance, and to develop and communicate informed opinions about them.

CGW4U1 CANADIAN AND WORLD ISSUES: A GEOGRAPHIC ANALYSIS

This course examines the global challenges of creating a sustainable and equitable future, 12 focusing on current issues that illustrate these challenges. Students will investigate a range of topics, including cultural, economic, and geopolitical relationships, regional disparities in the ability to meet basic human needs, and protection of the natural environment. Students will use geotechnologies and skills of geographic inquiry and analysis to develop and communicate balanced opinions about the complex issues facing Canada and a world that is interdependent and constantly changing.

ADA4M1 DRAMATIC ARTS

This course requires students to experiment with forms and conventions in dramatic literature, and to create/adapt and present dramatic works. Students will do research on dramatic forms, conventions, themes, and theories of acting and directing from different historical periods, and apply their knowledge of these in analyzing and interpreting dramatic literature, including Canadian works and works from various cultures in the late twentieth century. Students will also examine the significance of dramatic arts in various cultures

HHS4U1 INDIVIDUALS AND FAMILIES IN A DIVERSE SOCIETY

This course applies current theories and research from the disciplines of anthropology, psychology, and sociology to the study of individual development, family behaviour, intimate and parent-child relationships, and the ways in which families interact within the diverse Canadian society. Students will learn the interpersonal skills required to contribute to the well-being of families, and the investigative skills required to conduct and evaluate research about individuals and families.

Art & Design Pathway

The aim of our Art and Design Pathway is to help students improve the conception, development, and execution of their design ideas. This is partly through the careful study of some of the world's greatest artworks and partly through practice.

Course Selection

To enter the year 12 Art & Design Pathway, students must have completed the equivalent of grade 11 and place at the grade 12 English and Mathematics level. The personalized study plan will determine which two of these credits will be completed in the Hybrid Education format, as well as which of the optional courses will be available.

STUDY PLAN: 6 COURSES

Required course:

Grade 12 English

Highly recommended:

Grade 12 Visual Arts

Related optional courses (pending availability):

Grade 12 Philosophy
Grade 12 Communications Technology
Grade 12 Dramatic Arts

Other optional courses:

Grade 12 Science (Chemistry, Physics, Biology)
Grade 12 Mathematics
Grade 12 Social Science (History & Geography)

Optional Related Programming (examples):

Sessions with the Artist-in-Residence
Photography Club
Portfolio Club
Yearbook Club
Social Media Club
TIFF Workshops (Documentary, Storyboarding, and Pixilation)

ENG4U1 ENGLISH

This course emphasizes the consolidation of the literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyze a range of challenging literary texts from various periods, countries, and cultures; interpret and evaluate informational and graphic texts; and create oral, written, and media texts in a variety of forms. An important focus will be on using academic language coherently and confidently, selecting the reading strategies best suited to particular texts and particular purposes for reading, and developing greater control in writing.

AVI4M1 VISUAL ARTS

This course focuses on the refinement of students' skills and knowledge in visual arts. Students will analyze art forms; use theories of art in analyzing and producing art; and increase their understanding of stylistic changes in modern and contemporary Western art, Canadian art, and art from various parts of the world. Students will produce a body of work demonstrating a personal approach.

HZT4U1 PHILOSOPHY

Questions and Theories This course enables students to acquire an understanding of the nature of philosophy and philosophical reasoning skills and to develop and apply their knowledge and skills while exploring specialized branches of philosophy (the course will cover at least three of the following branches: metaphysics, ethics, epistemology, philosophy of science, social and political philosophy, aesthetics). Students will develop critical thinking and philosophical reasoning skills as they formulate and evaluate arguments related to a variety of philosophical questions and theories. They will also develop research and inquiry skills related to the study and practice of philosophy.

TGJ4M1 COMMUNICATIONS TECHNOLOGY

This course examines communications systems and design and production processes in the areas of electronic, live, recorded, and graphic, recorded, or audio-visual projects independently and in project terms. Students will also study industry standards and regulations and health and safety issues, and will explore careers, the importance of lifelong learning, and the impact of communications technology on society and the environment.

AMU4M1 MUSIC

This course emphasizes the appreciation, analysis, and performance of music from the romantic period and the twentieth century, including art music, jazz, popular music, and Canadian and non-Western music. Students will concentrate on developing interpretive skills and the ability to work independently. They will also complete complex creative project

ADA4M1 DRAMATIC ARTS

This course requires students to experiment with forms and conventions in dramatic literature, and to create/adapt and present dramatic works. Students will do research on dramatic forms, conventions, themes, and theories of acting and directing from different historical periods, and apply their knowledge of these in analyzing and interpreting dramatic literature, including Canadian works and works from various cultures in the late twentieth century. Students will also examine the significance of dramatic arts in various cultures.

Math & Science Pathway

The chief aim of our Math and Science Pathway is to prepare and qualify our students to enter competitive math- or science-related undergraduate programs (e.g., Biology, Engineering, Computer Science, Pure Mathematics, Nursing).

Course Selection

To enter the year 12 Academic Math and Science Pathway, students must have completed the equivalent of grade 11 and place at the grade 12 English and Mathematics level. The personalized study plan will determine which two of these credits will be completed in the Hybrid Education format, as well as which of the optional courses will be available.

STUDY PLAN: 6 COURSES

Required course:

Grade 12 English
Grade 12 Advanced Functions
Grade 12 Calculus and Vectors
Grade 12 Physics

Highly recommended (where not otherwise required)

Grade 12 Chemistry
Grade 12 Biology

Other optional courses:

Grade 12 Art (including Music)
Grade 12 Social Science (History, Geography, Philosophy)

Optional Related Programming (examples):

Preparation for the University of Waterloo international competitions (Mathematics, Physics, and Computer Science)
Computer Science Club
STEM Club
Peer tutoring

ENG4U1 ENGLISH

This course emphasizes the consolidation of the literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyze a range of challenging literary texts from various periods, countries, and cultures; interpret and evaluate informational and graphic texts; and create oral, written, and media texts in a variety of forms. An important focus will be on using academic language coherently and confidently, selecting the reading strategies best suited to particular texts and particular purposes for reading, and developing greater control in writing.

MHF4U1 ADVANCED FUNCTIONS

This course extends students' experience with functions. Students will investigate the properties of polynomial, rational, logarithmic, and trigonometric functions; develop techniques for combining functions; broaden their understanding of rates of change; and develop facility in applying these concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics.

MCV4U1 CALCULUS AND VECTORS

This course builds on students' previous experience with functions and their developing understanding of rates of change. Students will solve problems involving geometric and algebraic representations of vectors and representations of lines and planes in three-dimensional space; broaden their understanding of rates of change to include the derivatives of polynomial, sinusoidal, exponential, rational, and radical functions; and apply these concepts and skills to the modeling of real-world relationships. Students will also refine their use of the mathematical processes necessary for success in senior mathematics.

SPH4U1 PHYSICS

This course enables students to deepen their understanding of the concepts and theories of physics. Students will explore further the laws of dynamics and energy transformations, and will investigate electrical, gravitational, and magnetic fields; electromagnetic radiation; and the inter-face between energy and matter. They will further develop inquiry skills, learning, for example, how the interpretation of experimental data can provide indirect evidence to support the development of a scientific model. Students will also consider the impact on society and the environment of technological applications of physics.

SCH4U1 CHEMISTRY

This course enables students to deepen their understanding of chemistry through the study of organic chemistry, energy changes and rates of reaction, chemical systems and equilibrium, electrochemistry, and atomic and molecular structure. Students will further develop problem-solving and laboratory skills as they investigate chemical processes, at the same time refining their ability to communicate scientific information. Emphasis will be placed on the importance of chemistry in daily life, and on evaluating the impact of chemical technology on the environment.

SBI4U1 BIOLOGY

This course provides students with the opportunity for in-depth study of the concepts and processes associated with biological systems. Students will study theory and conduct investigations in the areas of metabolic processes, molecular genetics, homeostasis, evolution, and population dynamics. Emphasis will be placed on achievement of the detailed knowledge and refined skills needed for further study in various branches of the life sciences and related fields.

Business Pathway

The main aim of our Academic Business Pathway is to enable students to grasp the basic principles and procedures that are employed by business in both North America and other regions of the world.

Course Selection

To enter the year 12 Academic Business Pathway, students must have completed the equivalent of grade 11 and place at the grade 12 English and Mathematics level. The personalized study plan will determine which two of these credits will be completed in the Hybrid Education format, as well as which of the optional courses will be available.

STUDY PLAN: 6 COURSES

Required course:

Grade 12 English
Grade 12 Math Advanced Functions

Highly recommended:

Grade 12 Calculus & Vectors

Related optional courses (pending availability):

Grade 12 Financial Accounting Principles
Grade 12 International Business Fundamentals
Grade 12 Business Leadership: Management Fundamentals

Other optional courses:

Grade 12 Science (Chemistry, Physics, Biology)
Grade 12 Art (including Music)
Grade 12 Social Science (History, Geography, Philosophy)

Optional Related Programming (examples):

Student Government
Model United Nations
University of Waterloo Resume Building Workshop
University of Toronto Market Simulation Challenge
Social Media Club

Students will also refine their use of the mathematical processes necessary for success in senior mathematics.

MCV4U1 CALCULUS AND VECTORS

This course builds on students' previous experience with functions and their developing understanding of rates of change. Students will solve problems involving geometric and algebraic representations of vectors and representations of lines and planes in three-dimensional space; broaden their understanding of rates of change to include the derivatives of polynomial, sinusoidal, exponential, rational, and radical functions; and apply these concepts and skills to the modeling of real-world relationships. Students will also refine their use of the mathematical processes necessary for success in senior mathematics.

BAT4M1 FINANCIAL ACCOUNTING PRINCIPLES

This course introduces students to advanced accounting principles that will prepare them for postsecondary studies in business. Students will learn about financial statements for various forms of business ownership and how those statements are interpreted in making business decisions. This course expands students' knowledge of sources of financing, further develops accounting methods for assets, and introduces accounting for partnerships and corporations.

BBB4M1 INTERNATIONAL BUSINESS FUNDAMENTALS

This course provides an overview of the importance of international business and trade in the global economy and explores the factors that influence success in international markets. Students will learn about the techniques and strategies associated with marketing, distribution and managing international business effectively. This course prepares students for postsecondary programs in business, including international business, marketing, and management.

BUSINESS LEADERSHIP: MANAGEMENT FUNDAMENTALS

This course focuses on the development of leadership skills used in managing a successful business. Students will analyze the role of a leader in business, with a focus on decision making, management of group dynamics, workplace stress and conflict, motivation of employees, and planning. Effective business communication skills, ethics, and social responsibility are also emphasized.
